Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art neither teaches nor fairly suggests a computer system for recommending an optimal treatment protocol for cancer wherein the system comprises a modifier adapted to modify a cancer system model based on parameters specific to an individual. Similarly, the prior art does not teach or fairly suggest a computer-implemented method wherein a cancer system model is modified based on parameters specific to an individual.

The examiner interprets "cytologic specifics" to be cytological information specific to a tumor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

The drawings filed on 10/19/00 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948, originally mailed with the Office Action of 2/26/01. A copy of the original PTO-948 is attached for applicant's convenience. Briefly, the margins on Figures 3, 5, and 13 are too narrow and would result in information in the margins being obscured or lost upon printing. In Figure 7, the details of the different lines are unclear (i.e. can't tell the difference between the symbols). Figures 2, 3, and 5 have illegible, overlapping, or otherwise hard to read numbers or reference characters. In order to

avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Conclusion

Claims 234-247 and 466-479 are allowed.
